

Ali Abbas Qazi

Cybersecurity Intern | Blue Team: Threat Detection · Incident Response · Digital Forensics
Islamabad, Pakistan | aliabbasqazi@gmail.com | linkedin.com/in/ali-abbas-qazi | github.com/Ali-Abbas-Qazi

SUMMARY

Second-year BS Cybersecurity student and current cybersecurity intern at Networkwalks, focused on blue-team operations: threat detection, incident response, and digital forensics. Hands-on, documented experience in penetration testing, reconnaissance, vulnerability assessment, log analysis, and web application security across public GitHub project reports. Google Cybersecurity Professional Certificate holder seeking a cybersecurity internship to apply attacker-informed analysis to defensive monitoring and detection.

TECHNICAL SKILLS

Security Operations & Defense: Threat Detection, Incident Response, Log Analysis, Phishing Analysis, Digital Forensics, Vulnerability Assessment, SIEM Fundamentals
Offensive Security & Recon: Penetration Testing, Web Application Security, Footprinting & OSINT, Network Discovery & Enumeration, SQL Injection Testing, Password & Hash Cracking, WAF Detection
Tools: Nmap, Zenmap, Nikto, WhatWeb, wafw00f, dnsrecon, WHOIS, John the Ripper, Wireshark, Kali Linux, VirtualBox, Git
Programming & Scripting: Python, C++, Java, SQL, Bash
Frameworks & Standards: PTES, NIST SP 800-115, NIST Cybersecurity Framework
Operating Systems: Linux (Kali, Ubuntu, WSL), Windows

EXPERIENCE

- Cybersecurity Intern** — Networkwalks, Islamabad Sep 2026 – Present
- Conduct black-box penetration tests of web applications in authorized environments, identifying SQL injection, authentication bypass, and unauthenticated data exposure.
 - Perform footprinting, network scanning, and service enumeration (Nmap, Zenmap, Nikto, WHOIS, dnsrecon) to map attack surface and misconfigurations.
 - Produce professional penetration-test reports with CVSS-rated findings, evidence, and remediation guidance, published as GitHub portfolio projects.
- Vice President** — HITEC Cyber Community (HCC), Islamabad Jan 2026 – Present
- Lead a cross-functional executive team to plan and deliver technical workshops, Capture the Flag (CTF) competitions, and security-awareness seminars.
 - Mentor junior members and structure skill-development pathways to sustain community growth.
- Red Team Co-Head** — HITEC Cyber Community (HCC), Islamabad Sep 2024 – Dec 2025
- Co-led the university Red Team in penetration testing and vulnerability assessments to identify security gaps.
 - Ran hands-on workshops on ethical hacking and defensive techniques.

PROJECTS

- Hospital Web Application Penetration Test (Black-Box)** github.com/Ali-Abbas-Qazi
- Chained username enumeration with a SQL injection authentication bypass to reach restricted patient data without credentials; cracked 3 password-protected PDFs via hash extraction and dictionary attacks.
 - Used Nikto to uncover directory indexing exposing an unauthenticated database backup (staff PII, shareholder records); delivered a report with 6 CVSS 3.1-rated findings and remediation.
- Reconnaissance & Network Discovery Assessment** github.com/Ali-Abbas-Qazi
- Footprinted a live web target (WHOIS, dnsrecon, WhatWeb, HTTP headers, wafw00f), surfacing missing security headers, SPF/DMARC gaps, and version disclosure; followed PTES and NIST SP 800-115.
 - Mapped 11 live hosts on a /24 network via a Zenmap/Nmap ARP sweep with OUI vendor profiling; reported 6 severity-rated findings with remediation.
- PDF Password Recovery & Hash Analysis** github.com/Ali-Abbas-Qazi
- Extracted PDF password hashes and recovered credentials through dictionary attacks with John the Ripper and the Johnny GUI; documented the workflow and defensive takeaways on password strength.
- Insider Threat Detection Tool** github.com/Ali-Abbas-Qazi
- Built a Python tool to detect behavioral anomalies and flag potential insider-threat indicators.
- Cybersecurity Lab Environment Setup** github.com/Ali-Abbas-Qazi
- Built an isolated VirtualBox/Kali penetration-testing lab on a private NAT network with static IP, snapshots, and host-VM integration; diagnosed and resolved a Linux NetworkManager connectivity issue.

EDUCATION

- BS Cybersecurity** — HITEC University, Islamabad Sep 2024 – Jul 2028 (expected)
- High School Diploma, Computer Science** — Beaconhouse, Islamabad 2022 – 2024
